On the Whitespace Platform, stamps are displayed in a naturalistic, 'wonky' manner, with some minor variation in their alignment. This duplicates the way physical stamps appear on paper contracts.

To have stamps export as horizontal rather than the default wonky style, select the 'Horizontal' radio button. Click 'Export' to export the contract.

Contracts can be configured to export with the stamps aligned horizontally. Select 'Export' from the blue drop-down 'Actions' menu.

In the 'Export' window, the stamp layout options appear towards the bottom left.

In the newly-created PDF, the stamps are perfectly horizontal.

Please note that when the export settings are configured for horizontal stamp layout, the stamps are still displayed in their default wonky style within the Platform.
