

Whitespace Platform

Release Notes v3.4.3

Author: Tim Dedopulos
Date: 19th November 2025

Headlines

Contracts that have been through the Bindable Quotes stage are now properly accepting off-platform lines as expected. During export, verticalised contract headings excluded from the output are no longer being included. The automatic calculation of the number of decimal places on declaration lines is fully accurate again. Facilities with lines signed to six decimal places are no longer triggering recalculation of the leader's line when showing.

Resolved Issues

- An error was preventing users from adding off-platform lines to contracts that had been advanced to firm order from the Bindable Quotes stage. The contracts were erroneously receiving extra background data that should not have been included with off-platform stamps.
 - This erroneous data has been removed, and off-platform lines can now be properly added to all firm orders advanced from Bindable Quotes.
- An export error was occurring when exporting verticalised contracts with each set of terms separated out as an individual document. In cases where a verticalised contract heading fell under a contract section that had been excluded from the export document, that heading was still being included in the export.
 - Verticalised contract headings are no longer being erroneously included in exported contracts when their contract section has been excluded.
- Declarations with both the auto-cascade function enabled and the number of decimal places on the declaration line set to 'auto' calculation were encountering minor discrepancies. Under certain circumstances, small rounding errors were being applied to the calculated total order percentage.
 - This has been corrected, and order percentages are again being calculated correctly in all instances.
- Declarations made to some facilities signed to six decimal places were erroneously recalculating the lead underwriter's line percentage to seven decimal places as the declaration was being shown.
 - Lines are no longer unexpectedly being recalculated when showing any declaration.

Installation and Access Guide

iOS App

No update is required.

Browser

The Whitespace Platform on Browser updates automatically. If you are already logged in at the time of the update, you will see a notice requiring you to refresh the page.
