

Whitespace Platform

Release Notes v3.5.1

Author: Tim Dedopulos
Date: 3rd February 2026

Headlines

Attachments can be linked to contract endorsements again, provided the contract is not a layer.

Enhancements

- Having added an endorsement or MTPC to a layer contract linked to a programme, an error was making it possible to link attachment documents to that endorsement. All attachments in a contract related to a programme should only be managed centrally from the programme itself.
 - This issue has been resolved, and there is no longer an option to link an attachment to a layer's endorsement.
- Similarly, it was no longer possible to link an attachment to an endorsement if the endorsed contract was not a programme layer. The option to do so was missing.
 - The missing action has been restored, and users can again link attachments to endorsements as usual for non-layer contracts.

Production Installation and Access Guide

Browser

The Whitespace Platform on Browser updates automatically. If you are already logged in at the time of the update, you will see a notice requiring you to refresh the page.

iOS App

The iOS app has been temporarily withdrawn whilst we redesign it. Watch for news of its exciting relaunch.
