Mapping Custom Contract Headings to Standard MRC Headings

1.

By default, contract headings that are not listed in the Lloyd's MRC are not taggable under the defined data system, as indicated here by the absence of a luggage tag icon

2.

While editing the custom heading's text, select the appropriate MRC entry from the drop-down list on the right

Custom contract headings may be marked as equivalent to a taggable MRC entry, granting access to its tags

3.

Highlight the text to be tagged, click on the tag to apply to the text, and click 'Next' to finalise the tag details, as usual
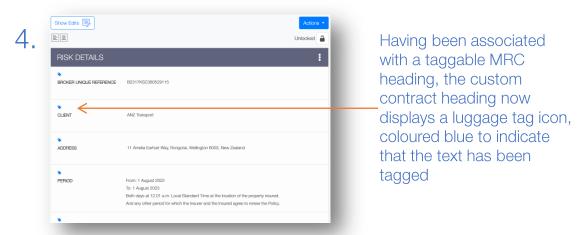

Once a taggable MRC heading has been selected, the side panel changes to the usual defined data tag selection

4.

Having been associated with a taggable MRC heading, the custom contract heading now displays a luggage tag icon, coloured blue to indicate that the text has been tagged

Saved mappings can be reset by removing all tags from the text and changing the contract heading.
