

Whitespace Platform Version 1.4.5 Release

Author: Jack Harrison

Date: 23rd October 2020

1 Release Details

This release of the Whitespace Platform introduces functionality for inserting tables in published contracts.

New Functionality

Insert Tables

- Brokers and underwriters can add tables to contracts and endorsements by selecting the 'Edit' and 'Insert Table' buttons on a particular heading.
- Tables can be copied from Excel spreadsheets and pasted directly into Whitespace.
- New and existing tables can be edited directly in Whitespace.
- New option to add multiple text boxes to improve text formatting with tables.

Bug Fixes

- Fix for the display of tables in Word (.docx) exports.

Known Issues

- When pasting in a table copied from Excel, an unexpected carriage return may sometimes appear within the text of an individual cell. This can be subsequently edited and removed if required.
- When exporting to Word, if you have a wide table (that causes the page to flip to landscape) and you have added text after the table, that additional text is omitted from the Word document generated.

2 Production Installation and Access Guide

iOS App Users

No changes have been made to the iOS app. Users can continue using the latest version of the app, which is available on the Apple App Store.

Browser Users

The Whitespace Platform on Browser will update automatically. If you are already logged in at the time of the update, you will see a notice requiring you to refresh the page.
