

Line Conditions

1.

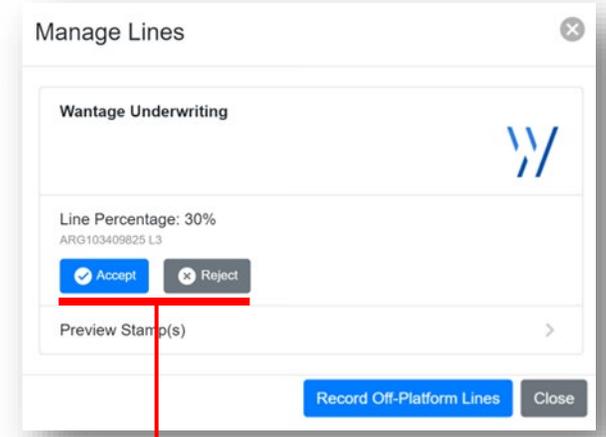

To add line conditions to a stamp, the underwriter clicks on the '# Condition(s)' button in the 'Add a Line' box, and ticks the conditions to apply, then submits the stamp as usual.

2.

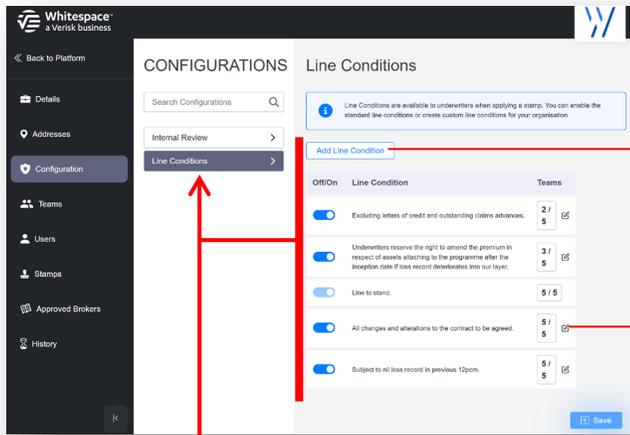

The written line is shown as 'Pending' for both the broker and the underwriter(s), with the line conditions clearly listed below the stamp.

3.

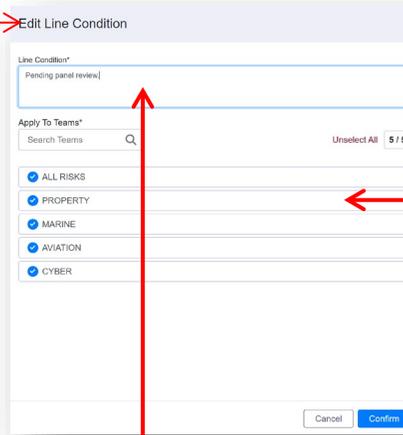

After clicking the 'Manage Lines' bar, the broker may click 'Accept' to confirm the line, removing the 'Pending' status, or 'Reject' to remove the line.

4.

(Re)insurer Admins can configure line conditions available to their underwriters from the Admin portal. Select 'Line Conditions' from the 'Configuration' tab. Lines can be added, removed, toggled as visible, and edited by clicking the pen-and-paper icon.

5.

Click team names to toggle the condition's availability for that team.

Add/edit the condition text as appropriate. Please note that the 'Line to stand' condition is always available to all underwriters, and cannot be removed or edited. Click 'Confirm' and then 'Save' to apply the changes.

6.

USAGE OF STANDARD LINE CONDITIONS

- **'Line to Stand'** states that the Broker may not sign down the written line percentage.
- **'All changes and alterations to the contract to be agreed'** means that the underwriter needs to be an agreement party on all endorsements.
- **'Subject to nil loss record in previous 12pcm'** shows that the line stands only when the insured has not claimed for a loss in the last year.
- **'Excluding letters of credit and outstanding claims advances'** states that the (re)insurer will not cover policies tied to letters of credit or accept advances as part of the policy's insured amounts/liabilities.
- **'Underwriters reserve the right to amend the premium in respect of assets attaching to the programme after the inception date if loss record deteriorates into our layer'** allows the (re)insurer to amend the premium if the loss record changes over the course of the policy being active.
