

Whitespace Platform

Release Notes v3.5.3

Author: Tim Dedopulos

Date: 6th February 2026

Headlines

A bug causing significant delays when calling an **activities** API endpoint has been fixed.

Enhancements

- The `/api/activities/{rootID}/full` endpoint returns a full list of all the activity documents ever recorded against a contract. One of the procedures used when calling it was causing significant slow-downs on both the Whitespace Platform and via API.
 - The procedure slowing down the endpoint call has been circumvented without any loss of functionality. There are no longer any delays when the endpoint is called, either on the Platform or via the API.

Production Installation and Access Guide

Browser

The Whitespace Platform on Browser updates automatically. If you are already logged in at the time of the update, you will see a notice requiring you to refresh the page.

iOS App

The iOS app has been temporarily withdrawn whilst we redesign it. Watch for news of its exciting relaunch.
