

Whitespace Platform

Release Notes v3.4.1

Author: Tim Dedopulos
Date: 5th November 2025

Headlines

As per the new Velonetic policy, consortium and coverholder stamps with codes starting with 3 and 6 are now valid for use in the Whitespace Platform.

Contracts with attachments are successfully exporting to PDF in all instances again.

Enhancements

- Velonetic have begun allocating consortium and coverholder codes in the ranges 3000-3999 and 6000-6999. To ensure that (re)insurers are able to configure these stamps for use via the Admin portal, C&C codes in these ranges now pass all Whitespace validation checks and are fully available for use as required.
- In certain unusual instances, exporting a PDF that combined a quoted contract with one or more included attachments was failing, returning an error. In these instances, no export PDF was being generated.
 - The trigger for this error has been identified and the underlying issue rectified. All contracts with attachments are again exporting to PDF as expected.

Installation and Access Guide

iOS App

No update is required.

Browser

The Whitespace Platform on Browser updates automatically. If you are already logged in at the time of the update, you will see a notice requiring you to refresh the page.
