

Whitespace Platform

Release Notes v3.2.3

Author: Tim Dedopulos

Date: 11th June 2025

Headline

When using the API's `editLineItem` call, it is again possible to supply the HTML for the contract heading's contents without an accompanying text element. Some irregularities in international date formatting have also been resolved.

Enhancements

- A change in the underlying structure of the contract files to rationalise the way certain items of information were being stored caused some minor discrepancies.
 - The `risks/editLineItem` API call was failing in certain cases when contract heading text was passed only as `html` elements. This has been fixed. It is again possible to pass contract text to the `editLineItem` call without providing populated `text` elements.
 - Additionally, in some instances international date displays were being formatted incorrectly. This too has been corrected, and dates again appear correctly regardless of the user's location.

Production Installation and Access Guide

iOS App

iOS users need to upgrade their Whitespace Platform iOS app to the latest version, which is available on the Apple App store. If you experience any difficulty signing in after the upgrade, it may be necessary to delete and reinstall the iOS app.

Please note that we are no longer able to include support for iOS v16. The Whitespace App requires iOS v17 to run.

Browser

The Whitespace Platform on Browser updates automatically. If you are already logged in at the time of the update, you will see a notice requiring you to refresh the page.
