

Chatting to Members of the Same Broking Team

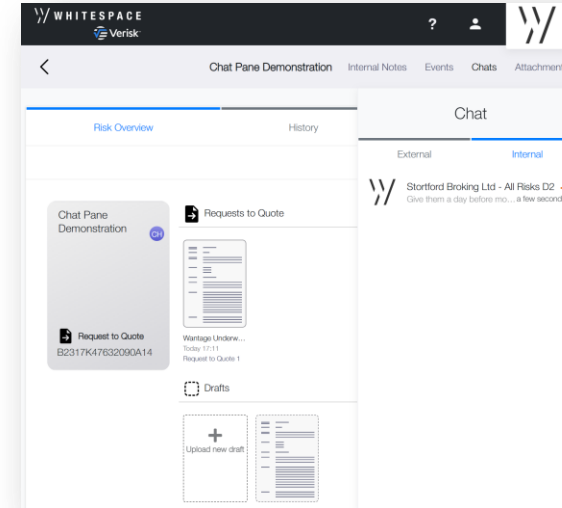

1.

The 'Chat' pane accessed from the contract overview now offers brokers 'External' and 'Internal' tabs.

The 'External' chat tab preserves the old functionality, allowing brokers and underwriters involved in a contract to talk with each other.

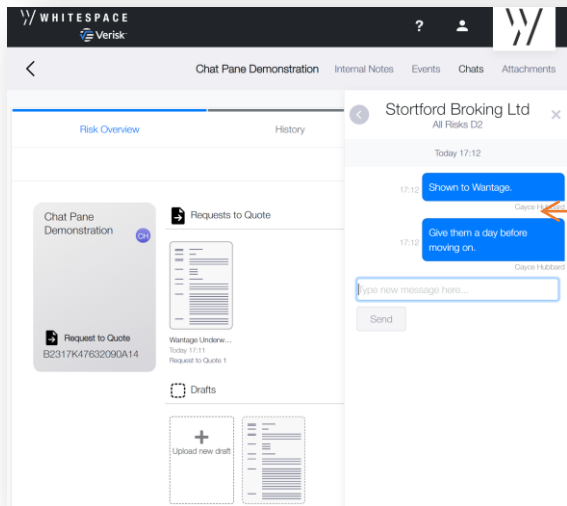

2.

The 'Internal' chat tab is only accessible to members of the same Whitespace platform team as set up by the broking organisation's admins.

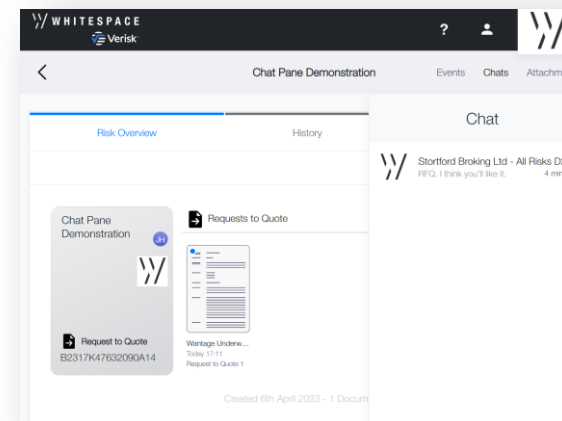

Members of other teams cannot see the chat (or the contract).

3.

This 'Internal' chat tab gives team-mates a space to discuss matters regarding specific contracts without any risk of this information getting passed on.

4.

Underwriters shown the contract have access to the old chat functionality for discussing the contract with the broker, but do not have any access to the 'Internal' chat.
