

Whitespace Platform Version 1.5.1

Author: Jack Harrison

Date: 27th November 2020

1 Release Details

This release of the Whitespace Platform introduces improved proportional calculation of signed lines and a fix for iOS authentication.

New Functionality

Proportional Signed Line Calculations

- When signing a risk, brokers can specify the number of decimal places for proportionally signing down lines. This gives brokers the flexibility to simplify line calculations for oversubscribed risks which result in line percentages with many decimal places, or to maintain up to 7 decimal places.
- On an oversubscribed risk with decimal places specified, the platform will adjust total percentages so that the sum of line percentages is equal to 100% or the intended total specified by the user.

Resolved Issues

- Fix to authentication on iOS where users had to re-enter their username and password rather than authenticating with their pin/fingerprint/face id.

2 Production Installation and Access Guide

iOS App Users

iOS users will need to upgrade their Whitespace Platform iOS app to the latest version, which is available on the Apple App Store.

If you experience any difficulty signing in after the upgrade, it may be necessary to delete and reinstall the iOS app.

Browser Users

The Whitespace Platform on Browser will update automatically. If you are already logged in at the time of the update, you will see a notice requiring you to refresh the page.
